OUR STORY
On the first day of kindergarten Tamia was a sweet, happy girl from Colombia; who loved to dance and sing. But after only a week of attending kindergarten she was not that same bubbly girl. Tamia did not like going to school because no one understood her. She was frustrated and sad. In the YMCA’s Kindergarten Academy Tamia received help with her homework, learning English and other skills needed to succeed in school. Little by little Tamia started gaining self confidence, language, cognitive and social skills. Tamia grew back her happiness and love for music, dance and learning. Tamia is now a successful bilingual first grader!

OUR STORY
Steven and his mother, Morella, recently relocated from Venezuela to the US. As a single mom new to the area, Morella was searching for a safe and meaningful place for her son to be while she was at work. Steven thrived in our programs as a kindergartner—he received help with his homework, increased his English speaking skills and made meaningful and lasting friendships. Morella was grateful for the help her son received, but she needed help herself. An industrial engineer in Venezuela, she was struggling to develop as a professional and find quality employment in the US. Morella participated in the YMCA ESL and Money Matters courses which helped her develop her marketable job skills. Steven and Morella have found a new home here and look forward to continuing to learn and grow with the Y for many years to come.

He is now 14 years old and continues to look forward to going back to camp each summer. Each year Ethan comes back with greater confidence and an expanded attitude of leadership. Ethan’s personal growth has come through one-on-one goal setting, follow-up and accountability, the ability to be unplugged from the digital world, experience nature and better understand how personal interaction with others and the friendships that are created help make people happy and healthy. The staff makes it all possible through their personal mentoring and monitoring of his experience which ensures Ethan is not only surviving, but thriving."

OUR STORY
In the winter of 2012 Karen and Yesica were enrolled in the YMCA’s Afterschool Program at Mound Fort Jr. High. The two girls were in different groups at school and did not like one another, they struggled with communication skills that had caused serious consequences. The environment that these youth were around was teaching them to solve arguments with physical aggression verses words. The YMCA worked with both of them to develop their character and communication skills needed to settle an argument peacefully. The two girls learned about empathy and what that means as well as learning to listen to each other and use “I” statements instead of “you” statements. Now they are the best of friends. We are confident that the communication skills, character development and friendship they have built will benefit their entire lives.
